SERVING MEALS IN ENGLAND.

How Properly Trained Servants Should Wait at Table.

The following detailed directions for serving the three daily meals in an English household will be of interest to American housekeepers. While the essentials of these rules, given in the Queen, fit American customs, there are

some curious differences. The first meal, breakfast, requires just as much care bestowed on it as any other, says the writer. The white cloth should be laid over the balze cloth perfectly straight and smooth. Then the small cruets are placed at the corners or in front of each person; the tea and coffee are placed at the bottom of the table in front of the mistress of the house; plates of rolls, toast racks, butter, jam, and marmalade are arranged nicely on the table; a place is laid for each person, knives and two forks, one knife usually

In small households, at any rate, the hot dishes, such as bacon, fish, &c., are aced at the head of the table in front of the master of the house, though nowadays a good many prefer to have these on the sideboard on a hot plate, together with the cold dishes, so that people can help themselves as they like. If fruit s given, this may be placed on the table the plates, knives, and forks for it being arranged on the sideboard.

For lunch in most houses, the table is laid just as for dinner, save that the flowers are usually simpler. A tumbler and two wineglasses are arranged on the right hand of each cover, and very often a salad plate is placed on the left side Luncheon varies in every house almost n some it is perfectly informal, the sweets being placed on the table, and all the meat dishes, whether hot or cold, are arranged on the sideboard with the vegetables, so that persons may help them-

Finally, there is the dinner table. The cloth is laid as before; then at the corners are placed the little salts and pep-pers and two tablespoons, and a place is laid for each person, as follows: The soup spoon is placed on the right-hand a fish knife and fork, and a large knife and fork, and where there is only one servant to wait, a small spoon and fork are arranged above the space for the plate, the dinner napkin is folded and placed in the middle, with a piece of bread or roll in the folds.

Other knives and forks are added as required, the servant bringing them on a folded napkin and placing them on the table. Where there are two or more servants waiting the small spoon and fork are not put down until required, nor are the tablespoons placed at the corners of the table. The glasses are arranged on the right side, a tumbler and two wineglasses being placed for each person.

Table centers are hardly, if ever, seen nowadays, but the flowers are arranged in the center according to the taste of make careers has about died out, because the person. MORNING CHIT-CHAT.

Competition, as every one knows, was never ener than it is to-day.

The professions and trades, especially those open women, were never more crowded. But even now there's one place in every profes-

-and that's at the top. A girl whose parents wanted her to study stenography came to me the other day complaining that she

did not want to be a stenographer because she knew a great many girls who had worked for years for \$10 and \$8 and even \$6 a week, and she didn't think that was enough. "Yes," I answered. "So do I, but I also know quite

a few who get \$20 and \$25 and even \$30 a week.' "But there are so few places of that kind," she protested.

Ruth Cameron. "A great many more than there are girls to fill them," I assured her.

And then in answer to her look of incredulity I told her of a talk I once had with a man who hires hundreds of stenographers every year. "It's easy enough to get plenty of \$10 and \$12 girls for the lower positions," he said; "the trouble is to get the \$20 girls. You know we have a good many responsible positions and we need that kind of girls to fill them, but you've no idea how hard they are to get. Of course, we can train some of the lower priced girls, but not near enough. Why last year we sent to Washington (the firm has its headquarters in Boston) for a girl to fill an important position, simply because we could not get one

It's the same, for instance, in teaching. I once heard the head of a teacher's agency say that it was the \$1,000 nd \$1,200 positions that he had the most trouble in filling. "It's economy to pay high and get good men," is the slogan of most

of the progressive business firms. It is a good thing if you have an aptitude for any of them to enter some of the less crowded professions. Or, if you have the capital and ability, it is good to take up some business that has not yet been ex-

tensively exploited. But if your aptitude and the circumstances make it better to enter some more common and more crowded profession or business, don't be
